DEKKA SE FLAGSHIP STAINLESS STEEL TAPE HEAD

Premium Stainless Steel Tape Head Delivering Consistent Reliable Sealing

The flagship DEKKA SE tape head is our most popular tape head, providing consistent, reliable tape delivery for superior product protection while minimizing tape wastage. As one of the most forgiving tape heads on the market, the DEKKA SE is suitable for almost any machine, using any tape, in any environment.

With the third iteration of the DEKKA SE, the tape head has been structurally reinforced while enhancing all major functions of the tape head. Improvements help reduce downtime and increase adoption with tool-less wipe down tension adjustment, on-machine pictorial guides and spare parts lists.

A strategic and streamlined design with premium components ensure product reliability and longevity. Every tape head is a promise of peace of mind and return for your investment.

STANDARD FEATURES

- Freedom to Choose. Run the style and type of tape that is right for your application with the versatility of the DEKKA SE
- Consistent product protection and minimal tape wastage with the patented No-break tape advance and improved wipe-down
- Long lasting product life with stronger materials and simple design for optimized motion and minimal strain on the tape head

SPECIFICATIONS

Tape Width	Available in 2" or 3"	Tape Roll Size	1500 - 2000 yard rolls
Tab Length	2.325" - 2.75" (additional lengths available)	Construction	Stainless steel
Speed	80 - 120 feet per minute		

Note: Higher speeds can be achieved depending on application.

JOINING THE DEKKA FAMILY

We are committed to every Dekka tape head and therefore provide the best level of service to all our partners and users. To us, it is not just about protecting your product, but your reputation as well. With Dekka tape heads, you can trust in our wide network of service technicians and experienced support team to be there when you need them.

OPTIONS AND ACCESSORIES

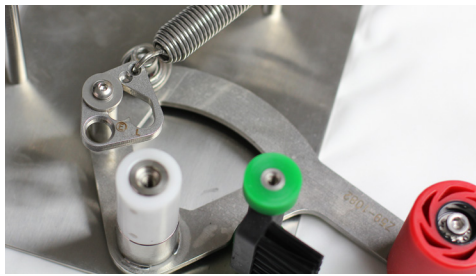

- Mirror Image Version
- Dekka Tape Management System
- Horizontal Mounting

FEATURES

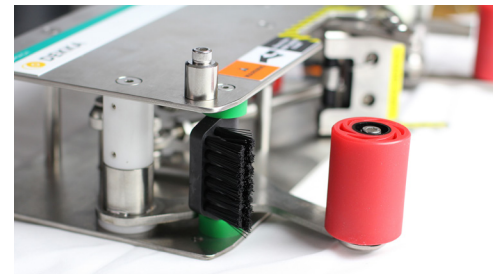

Premium Robust Construction

Precision cut, high quality finished stainless steel for increased corrosion resistance, long lasting performance and a premium look.

Tool-less Tension Change for Better Adaptability

Wipedown tension can now be quickly and easily changed without tools to better adapt to different tapes and applications.

Improved Case Seal and Product Protection

Longer wipe down arms with the addition of an adjustable brush evenly distributes wipe down pressure across the entire tape surface.

Quick and Easy Tape Threading

Dekka's open side frame design along with on-machine pictorial guides allows tape threading to be done in 30 seconds or less.

Patented No-Break Tape Advance

The DEKKA SE pulls along the centerline of the tape roll to avoid putting stress on the edges where most tape breakages occur.

Improved Usability and Training

On-machine labels identifying common adjustment points and spare parts for easy machine operation and training.
